

UPDATED STATUS REPORT ON NEW VPIS DEVELOPMENT

Pre-registration is currently available. Implementation of the New VPIS has been delayed for several months. We do not have a new target implementation date, but as soon as it is available we will post it. In the meantime, you can continue to pre-register. Due to the problems encountered with pre-registration, especially Jinitiator, we will be posting some troubleshooting tips to provide suggestions for some of the more common problems.

Both new user registrations and transfer validations for current MOCAS users will require you to know the CAGE or DUNS and the Taxpayer Identification Number (TIN) for each entity you want associated with your new User ID and Personal Identification Number (PIN). Now is a good time to revalidate your Central Contractor's Registration (CCR) record or establish one if you don't currently have a CAGE. Foreign Vendors will want to review the important information item posted to VPIS News for more details about how you can register for a CAGE.

You may e-mail the VPIS Program Management Office with questions about the New VPIS application and the pre-registration process at DFAS-KC VPIS@dfas.mil.

(NOTE: Please address questions about VPIS data or specific payment actions to the appropriate operating location via the e-mail option provided within the VPIS application. The Program Management staff does not have the necessary information to assist you with these matters.)
